

Version: 10/01/2021

By following the recommendations in this guide, you can help your vinyl floor last you for a long time.
.....

I. Protect

DOOR MATS

Place non-rubber backed doormats at all entrances. Doing so helps to prevent dirt or grit on your floor. These abrasive particles could damage the floor, causing scratches. Do not use rubber-backed mats, as long-lasting contact with rubber can cause permanent discolouration. Never place doormats on a wet floor.

FELT PADS

It is recommended to use felt pads or protective feet for items that contain rubber, such as chair legs, furniture legs, fitness appliances, etc.

LIFT UP

Do not slide heavy objects across the floor. It is always ideal to lift the objects up to prevent scratches.

2. Clean

MAINTENANCE PRODUCTS

- Select cleaning agent that are PH neutral
- Do not use bleach or chlorinated compounds as it may cause discoloration
- Alcohol-based cleaners are ok to be used if compliant with the above guidelines

CLEANING INSTRUCTIONS

Remove all dirt and loose debris from the flooring with a brush or vacuum cleaner first. Then, clean with water and a pH neutral cleaning agent at least twice or until the water stays clean. Do not flood or leave puddles on the floor. Rinse thoroughly and soak up residual water.

- Spots, marks and spillages should be wiped up as soon as possible.
- Do not use wax or varnish coating.
- Do not use maintenance products that contain wax or oil.
- Do not use a steam mop.
